Hi, I am a machine learning engineer with an expertise in computer vision based applications. I am pursuing research at Simon Fraser University on kernel based tracking in images.

SKILLSET

Software: MATLAB, Octave
Languages and Tools: PyTorch, TensorFlow, Python, Numpy, Scipy, OpenCV, Matplotlib, GDAL as well as cloud services like AWS

EDUCATION

Simon Fraser University,Canada
Master of Applied Science, January 2018- Present CGPA: 3.92/4.33
JSS Academy of Technical Education, Noida, India
Bachelor of Technology, Electronics and Communication, June 2016

PROJECTS

Deep Attention Models for Human Tracking Using RGBD:
1. Worked in a team of 4 to develop an adaptive appearance model which works accurately in situations of color camouflage, even in the presence of complex natural objects.
2. Implemented a novel algorithm which improved the accuracy by approximately 50 % and reduced the type I error by 23% and type II error by 5%.

Celestini Project India:
1. Developed a prototype video analytic algorithms (68% accuracy) to run on Raspberry Pi 3 Model B.
2. Worked in a team of two where I was responsible for porting the code from MATLAB to OCTAVE. Also, worked on pre-processing the data to clean images, remove noise to infer position, lane and density of vehicles in front of the camera.

Prototype Landslide Risk Communication System:
1. Developed a system which forecasts and communicates occurrence of landslides.
2. Conducted field survey and implemented a system for sensor deployment (sensors, microcontroller boards, GSM module etc).

EXPERIENCE-RESEARCH

Graduate Research Assistant Jan 2018- present
Networked Robotics and Sensing Laboratory, SFU
School of Applied Science, SFU, Canada

Project Associate August 2017- November 2017
Indian Institute of Technology Kanpur, India
Department of Aerospace Engineering, IIT Kanpur, India

Research Intern May 2017- July 2017
Indian Institute of Technology Delhi, India
Department of Electrical and Computer Science, IIT Delhi,India

Research Intern June 2016- April 2017
Indian Institute of Technology Mandi, Himachal Pradesh, India
School of Computing and Electrical Engineering, IIT Mandi,India

EXPERIENCE-INDUSTRY

Machine Learning Intern February 2020- present
UrtheCast, Vancouver, Canada
1. As part of R&D team, I solely implemented machine learning system for satellite data (Landsat8, Landsat7, SPACRS, Sentinel 2 dataset) for multi class prediction of cloud, shadow and haze.
2. Implemented data ingestion pipeline to incorporate high volume of multi-dimensional data into standard format.
3. Scaled the algorithm using cloud based services like AWS EC2 for deployment server, S3 for data storage and docker for creating virtual environment and parallel deployment of multiple training jobs.

Robotics Intern April 2016- June 2016
Omnipresent Robot Tech, Delhi, India
Worked in the domain of robotics, tracking with Arduino, OpenCV C++, and intelligent electronics. The project included Speedobotix, an Arduino-based robot.

PUBLICATIONS

Book Chapter
